

Transponder Mounting Locations

Fix the transponder vertically, at a maximum of 60 cm (2 ft) above the track. We recommend 20 inches above the track. Make sure that the transponder has a clear view to the track with no metal or carbon fiber underneath. Maximum operating temperature should not exceed 122F/50°C.

Fix the holder on car with the fixing rod on top by using tie-wraps, screws or rivets. Fasten the transponder using the supplied fixing pin.

Modified, Sport Mod, Pro-Stock - Mounting Location - Rear motor plate.

Factory/Street/Hobby/Stock Cars - Mounting Location - Engine side of firewall, right hand side of car.
